Distant *adj. 1 far, far-off, remote, far away, longway-off; removed: The creature said he had come from a distant star, 2 away, off: The ship is ten miles distant. 3 aloof, detached, reserved, cool, cold, haughty, standoffish, unapproachable, inaccessible, withdrawn, reticent, ceremonious, formal stiff, rigid, frigid, unfriendly: You find him warm, but I think him very distant. Oxford Thesaurus*

The beautiful long notes played by these two virtuosos inspired the title for both recordings invoking the feeling of space and distance in more than just the physical or geographical sense. Time stands still and one becomes almost mesmerised by the beauty!!!
